

A WINNING PERFORMANCE

A formula race car relies on a steady supply of tires and parts to deliver a winning performance. The same goes for other hi-tech machines, like your air compressor. Our Parts Plan gives you the certainty of getting the right part at the right time.

Atlas Copco

Designed For The Purpose

The Parts Plan delivers genuine Atlas Copco parts at your doorstep. Parts that are designed and produced to the exact specifications of your compressor.

Our experts draw up a maintenance schedule based on your equipment and site conditions. Each delivery of parts triggers your technicians to perform the associated maintenance step.

ASK YOURSELF...

What happens if I source parts elsewhere?

As they are not designed specifically for your equipment, non-genuine parts may compromise the integrity and efficiency of your compressed air system. Genuine Atlas Copco parts guarantee the functionality of your compressor between maintenance jobs.

What's the risk of delaying maintenance?

Most parts have a specified lifespan. Failure to replace them on time may undermine your compressor's efficiency and reliability. This increases the production costs, but also the risk of a breakdown with an even bigger impact on your profitability.

How can I plan the maintenance effectively?

You can let the Parts Plan do that for you. The delivery of parts coincides with the scheduled maintenance intervals that are determined by our experts. The arrival of parts alerts your service team that it's time to perform maintenance.

What about financial surprises?

A Parts Plan provides you with all the parts you need at a predetermined cost. There are no unforeseen expenses for extra parts. And because the Parts Plan helps you to plan maintenance on time, the risk of a costly breakdown is reduced.

Free Up Time And Space

The Parts Plan covers a certain period, which means you have to budget for parts only once, eliminating the administrative burden of repetitive, time-consuming procurement processes for separate parts.

Keeping compressor parts in stock is no longer necessary. The right parts will be delivered to you when you need them, freeing up space and capital that you can use for your core activities, and helping you to achieve your saving goals.

"The Parts Plan helps us to plan the maintenance of our air compressors and because it costs less than purchasing single parts, it gives us a straight return."

Go For The Real Deal

Choose genuine parts to secure the performance of your air compressors. Let the Parts Plan structure your maintenance activities and put an end to ad-hoc budgeting.
