

*Atlas Copco*

**Maximize  
fuel efficiency  
and reliability**  
with a service contract

# Service Contracts make your operations more profitable

## Optimize uptime and energy use for your large mobile air compressor

Consistent availability and optimal performance are key in demanding drilling applications, yet **fuel costs and downtime** can be an important brake on potential profits. Proven to provide **substantial efficiency optimizations and cost savings, as well as total peace of mind**, Atlas Copco service contracts provide you the best possible business' performance.

### How we make all the difference for your operations

- Using **original Atlas Copco spare parts** will avoid pressure drops, increased energy consumption, or breakdowns, since non-genuine one-size-fits-all components are just not designed for your specific equipment. Due to corrosion and other unwanted effects they can lower the efficiency of your investment and even cause damage to it.
- Driven by a thorough understanding of your machine, solid training and years of experience, **service by Atlas Copco expert technicians** will assure the most appropriate, efficient and proactive maintenance.

### POTENTIAL SAVINGS EXAMPLE: DRILLAIR Y 35

 = 70,428 km in an average diesel passenger car

 = 10 acres of US forest needed to capture this CO<sub>2</sub> in 1 year\*\*

- Fuel Consumption : 85 l/hr
- Running hours: 1,000 h/year
- Diesel Cost: €2/ltr

Make  
your own  
calculations!

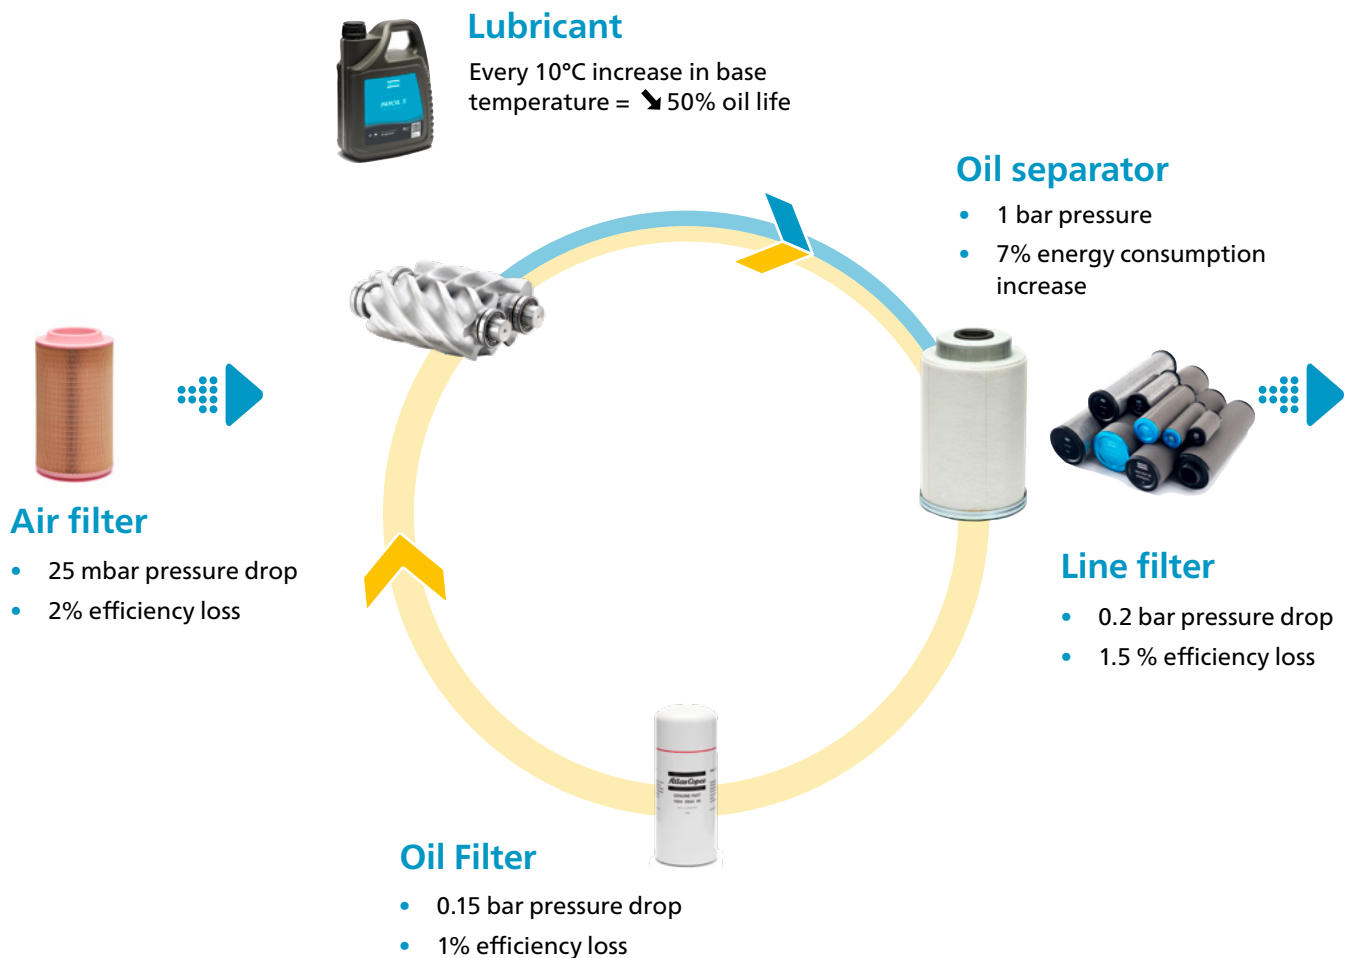

\*Based on a FleetLink connectivity modules data comparison as calculated on 31 July 2023.

\*\*According to epa.gov data.

# Only genuine Atlas Copco service will avoid pressure drops and efficiency loss

Impurities in the inlet air, high oil content in the air leaving the compressor or a lack of oil to seal the clearances and absorb contaminants can cause efficiency reduction or even the failure of your machine.

Original Atlas Copco parts and maintenance by expert technicians will prevent unwanted pressure drops and temperature rises, resulting in lower fuel consumption and higher efficiency.
