Service Pump Ltd invest in Atlas Copco PAS pumps

Service Pump Ltd, the service orientated pump hire solutions specialist, has added a substantial number of Atlas Copco PAS super silent diesel pump sets to their hire fleet.

David Berry, Managing Director at Service Pump said, *“When looking to expand our fleet, we were drawn to Atlas Copco because their reputation for high quality, reliable products would complement our commitment to providing world class service. Once we’d seen the high performance and compact size of the PAS pumps we were convinced they would meet the needs of our customers.”*

Having examined the options on the market, Service Pump chose to invest in Atlas Copco’s range of PAS super silent diesel pump sets because of their quality, reliability and ease of use. All of the pumps, which are fuel efficient and have environmentally friendly features such as the environmentally friendly fully bonded fuel tank and base, have been delivered in the green Service Pump livery. The robust canopy is powder coated galvanised steel making it resistant to corrosion whilst keeping noise to a minimum and optimising cooling. The PAS range has a compact footprint so requiring less space on increasingly tight work sites, as well as making them easier to transport. This is an increasingly important consideration as Service Pump supplies clients throughout the UK from their existing base in Wigan (in the north west of England) and has plans to establish additional locations.

To live up to their well-earned reputation for delivering excellent service, prior to delivery Service Pump complete a comprehensive pre-hire inspection on every item of equipment to ensure reliability and reduce down time for their customers. The team particularly liked the accessibility of the hose connections on the PAS pumps, as their low position makes them easier, safer and more user friendly to connect to. Once installed, the team offers 24 hour support, as well as visiting to complete routine service interval work on site.

In summary, David said, *“We are confident that our market leading service levels, and the reliability and performance of Atlas Copco’s PAS pumps will prove a winning combination for our customers. Working closely with Stuart McConaghy, Atlas Copco’s Pumps Sales Specialist, this is the first stage of a partnership that will result in us becoming a single point of contact for all pump solutions - both diesel and electric.”*
