Strategy

Organic Growth and Acquisitions

Research and Development

New product development

- New products and solutions, the driving force in organic growth
- Extend the product offer based on modular design concept
- Design and ergonomics
- Develop intelligent product concept

Capital Markets Day
November 12, 2003

Product Innovation

ROC D5 RRC

- Radio Remote Control
- Balanced design
 - Low center of gravity
 - High ground clearance
- Exceptional rough terrain capabilities

www.atlascopco-group.com

Product Innovation

Diamec U6 APC

- New Drill Design
 - Reliability
 - Power
 - Flexibility
 - Safety and Ergonomics
- New Hydraulic Control System

Product Innovation

Cobra Combi

- Petrol driven drill and breaker
 - Multi-purpose tool
- Portable, Flexible, Economical
- Higher operator comfort and less environmental impact
 - Lower vibrations
 - New vibration-dampening handles reduce vibration levels from 8 to 5m/s²
 - Less noise
 - Fulfilling the European Noise Directive (NED)
 - Cleaner emissions
 - Meets US emission regulations EPA1

Aftermarket concept

Aggressive growth of aftermarket business

- Develop global service concept/competence
- Introduce fleet management system
- Introduce more aftermarket products
- Focus through a separate organisation

Capital Markets Day
November 12, 2003

Key account strategy

- A closer partnership relationship between customers and suppliers, when possible based on performance contracts.

Atlas Copco

Construction & Mining Technique

Q3 2003

- Order volume growth, +8%
 - Mining orders continued to improve
 - Stabilization of order trend for light construction equipment
- Operating margins rebound
 - Very high invoicing offset sharply negative impact from currency
- Acquisition of Chinese rock drilling equipment manufacturer

Construction & Mining Technique

Market Position

- Global leader in rock drilling and excavation equipment and tools for hard rock construction and mining applications
- Defend strong market position by continuous product and service development and improved market presence and penetration
- Further develop position in mining, exploration drilling and light construction equipment
