

February 1, 2007

Atlas Copco

Report on Q4 and full-year 2006 summary

(unaudited)

Note: All figures are for continuing operations, unless otherwise stated.

Record results and significant capital distribution

- Continuous efforts to strengthen market presence and penetration pay off.
 - Organic order growth 21%.
- Revenues reached MSEK 13 582 (11 982), organic growth 18%.
- Operating profit was MSEK 2 464 (2 146), corresponding to a margin of 18.1% (17.9).
 - One time charge of MSEK 83 related to pension provisions.
- Profit before tax increased 14% to MSEK 2 382 (2 097).
- Sale of the equipment rental business concluded; net gain of MSEK 7 789.
- Profit for the period was MSEK 9 172 (2 182).
- Basic earnings per share were SEK 14.74 (3.46).
- 18.4 million B-shares repurchased for MSEK 3 776.
- Proposed 3:1 split and distribution to shareholders of SEK 44.75 per share through
 - annual dividend for 2006, SEK 4.75 (4.25) per share and
 - extra distribution of SEK 40 per share through mandatory redemption.

Summary of full year 2006 results

Orders received by the Atlas Copco Group in 2006 increased 23%, to MSEK 55 239 (44 744). Volume for comparable units increased 18%, price increases added 2% and structural changes 3%, while the currency translation effect was flat. Revenues increased 20%, to MSEK 50 512 (42 205), corresponding to 15% volume growth.

The Group's operating profit increased 33% to MSEK 9 203 (6 938), corresponding to a margin of 18.2% (16.4). The negative impact of changes in exchange rates compared with

previous year was approximately MSEK 450 for the year. Profit before tax amounted to MSEK 8 695 (6 863), up 27%, which corresponds to a margin of 17.2% (16.3). Profit from continuing operations was MSEK 6 260 (4 964). Profit for the period, including discontinued operations, totaled MSEK 15 373 (6 581), or SEK 24.48 (10.43) per share.

Operating cash flow before acquisitions, divestments and dividends totaled MSEK 2 106 (4 521) including discontinued operations.

Capital Structure

Dividend

The Board of Directors proposes to the Annual General Meeting that a dividend of SEK 4.75 (4.25) per share be paid for the 2006 fiscal year. Excluding shares currently owned by the company, this corresponds to a total of MSEK 2 899 (2 672).

Mandatory redemption of shares

The financial position of the Group is very strong due to a number of years with improved profitability and the recent disposal of the equipment rental business.

In order to adjust the Group's balance sheet to a more efficient structure, while preserving

adequate financial flexibility for further growth, the Board of Directors proposes to the Annual General Meeting a share redemption procedure, whereby every share is split into 2 ordinary shares and 1 redemption share. The redemption share is then automatically redeemed at SEK 40 per share. This corresponds to a total of MSEK 24 416. Combined with the proposed dividend, shareholders will receive MSEK 27 315. In addition, MSEK 3 776 has been used to repurchase shares in Q4 2006.

The split and redemption are subject to approval at the Annual General Meeting 2007. The payment of the redemption shares would, if approved, be made around June 20, 2007.

Divestment of the equipment rental business

On November 28, the Atlas Copco Group completed the divestment of Rental Service Corporation, USA, and Rental Service Corporation of Canada Ltd., its North American construction equipment rental business, to affiliates of the private equity firms Ripplewood Holdings L.L.C. and Oak Hill Capital Management, LLC.

Atlas Copco retains a 14.5% minority stake in the business and holds rights to notes. Issuance of the notes is contingent upon the profit development of the business until the end of 2008.

The specialty rental operation in the Rental Service business area, Prime Energy and Prime Mexico, remains in the Group. This business is integrated into the Specialty Rental division in the Compressor Technique business area as from January 1, 2007.

Revenues for this continuing business were MSEK 757 (709) and MSEK 181 (206) in 2006 and Q4 respectively. Operating profit was MSEK 252 (186) in 2006 and MSEK 61 (68) in Q4.

The total gain, net of taxes, was MSEK 7 789:

MSEK	Q2-Q3 2006	Q4 2006
Capital gain		6 900
Effect from that assets held for sale are not depreciated according to IFRS 5 (see page 8)	700	189

Review of the fourth quarter

Market development

The demand for the Group's products and services in **North America** continued to be strong in most product and customer segments. The manufacturing and process industries' investments in industrial equipment and demand for related aftermarket products remained strong. In the motor vehicle industry, however, the demand for advanced assembly tools and systems continued to be relatively weak. The demand from the mining and construction industries remained at healthy levels.

The demand from most customer segments in **South America** improved. Investments in mining, construction and compressed air equipment were particularly strong.

In **Europe**, demand was robust from most customer segments and healthy growth was recorded. Investments in compressed air equipment from manufacturing and process industries as well as from the construction industry increased. The motor vehicle industry's investments in advanced assembly tools and systems, however, decreased. The demand from the construction and mining industries remained healthy. Many important markets performed well and Great Britain, Russia, Sweden, Norway, and Spain all recorded double-digit order growth.

The **Africa/Middle East** region developed positively. Sales of construction and industrial equipment in the Middle East increased significantly.

Demand for compressed air equipment was very good throughout **Asia**, with particularly strong increases in China, India and Japan. Sales of other equipment recorded more moderate growth. In **Australia**, the demand remained strong, especially from the mining industry.

Currency, %	-8	-8
Price, %	+2	+2
Volume, %	+19	+16
Total, %	+16	+13
2006	14 131	13 582

Earnings and profitability

Operating profit increased 15% to MSEK 2 464 (2 146). The profit includes a one-time charge of MSEK 83 related to certain pension benefits in Belgium. Adjusted for this, the operating margin was 18.8% (17.9). Key drivers for the improved operating performance were significantly higher revenue volumes and a positive price development. All business areas contributed to the improvement in operating profit, in spite of negative translation impact from a stronger SEK. The changes in exchange rates, compared to previous year, had a negative effect of approximately MSEK 400.

Net financial items were MSEK -82 (-49). Net interest costs were MSEK -95, affected positively by interest income on cash proceeds from the divestment of the equipment rental business. Costs related to repurchase of bonds in January 2007 were booked in the quarter. These costs were more than offset by positive fair market valuations of derivatives and financial foreign exchange differences.

Profit before tax improved 14% to MSEK 2 382 (2 097), corresponding to a margin of 17.5% (17.5).

Profit for the period totaled MSEK 9 172 (2 182). This includes profit from discontinued operations, net of tax, of MSEK 7 405 (647) related to the sale of the equipment rental operations in North America; MSEK 316 from operations up until Nov 27, MSEK 6 900 in capital gain and MSEK 189 being the effect of discontinuing depreciation on assets held for sale (in accordance with IFRS). Basic earnings per share, including discontinued operations, were SEK 14.74 (3.46) and diluted earnings per share were SEK 14.73 (3.45).

The return on capital employed, including discontinued operations, during the last 12 months, was 35% (29) and the return on equity was 55% (28). The Group currently uses a weighted average cost of capital (WACC) of 8.5%, pre-tax equivalent approximately 11.8%, as an investment and overall performance benchmark.

Cash flow and investments, including discontinued operations

Cash flows from operating activities before changes in working capital reached MSEK 3 444 (2 997). Working capital increased by MSEK 1 960 (561); receivables and inventory increased as a consequence of the strong sales growth and seasonal large payments of supplier credits were made in discontinued operations. Net cash from operating activities reached MSEK 1 484 (2 436).

Cash flows from investing activities, excluding acquisitions and divestments of businesses, were MSEK -1 147 (-1 558). Operating cash flow equaled MSEK 337 (878).

Net cash/debt position

The Group's net cash position amounted to MSEK 12 364 (net debt 7 229), of which MSEK -1 647 (-1 826) was attributable to post-employment benefits. The debt/equity ratio, defined as net cash/debt position divided by shareholders' equity, was -38% (28).

Asbestos cases in the United States

As of December 31, 2006, Atlas Copco had 126 (201) asbestos cases filed with a total of 4 708 (16 739) individual claimants. It is important to note that none of these cases identifies a specific Atlas Copco product. In each case there are several defendants, on average 122 (119) companies per case.

The Group dedicates substantial time and professional resources to monitor and follow each

of these cases. Based on a continuous assessment of the actual exposure, the Group has not recorded any provisions related to these pending cases.

Employees

On December 31, 2006, the number of employees was 25 900 (22 578). For comparable units, the number of employees increased by 2 187 from December 31, 2005.

Distribution of shares

Share capital equaled MSEK 786 (786) at the end of the period, distributed as follows:

Class of share	Shares
A shares	419 697 048
B shares	209 109 504
Total	628 806 552
<i>- whereof B-shares</i>	
<i>held by Atlas Copco</i>	<i>-18 414 200</i>
<i>Total shares outstanding, net</i>	
<i>of shares held by Atlas Copco</i>	<i>610 392 352</i>

Parent Company

Profit after financial items for Atlas Copco AB totaled MSEK 52 730 (8 906) in 2006. The profit includes very large dividends and capital gains as a result of a significant capital restructuring within the Group.

Profit for the year, after appropriations and taxes, was MSEK 52 689 (8 395). Undistributed earnings totaled MSEK 55 977 (9 505).

Compressor Technique

The Compressor Technique business area consists of six divisions in the following product areas: industrial compressors, compressed air treatment products, portable compressors and generators, gas and process compressors, as well as specialty rental.

MSEK	October – December		Change %	January – December		Change %
	2006	2005		2006	2005	
Orders received	6 976	5 736	+22	27 910	21 770	+28
Revenues	6 823	5 795	+18	24 907	20 672	+20
Operating profit	1 350	1 210	+12	5 071	4 032	+26
<i>– as a percentage of revenues</i>	19.8	20.9		20.4	19.5	
Return on capital employed, %	70	70				

- Strengthened market presence and penetration supported another quarter of very strong order growth.
- Significant orders won in the gas and process compressor business.
- Operating profit up 12%, margin affected negatively by one-time item and currency.

Sales bridge

MSEK	October – December

North America	14	14
South America	6	5
Europe	44	49
Africa/Middle East	9	7
Asia/Australia	27	25
	100	100

Order volumes for stationary industrial compressors continued to improve supported by favorable demand and the consistent strengthening of presence and penetration in new and existing market segments. The good investment climate from previous quarters remained within all major customer segments and contributed to a strong demand. Investments in capacity increases as well as productivity enhancements were important drivers for equipment sales. The aftermarket business for industrial compressors continued to grow at a steady and high pace. Compressed air treatment products like filters and dryers also recorded very high growth. Geographically, all regions, without exceptions, were strong. The growth rate was particularly good in Eastern Europe, North and South America and in Africa/Middle East.

Orders for gas and process compressors increased significantly in the quarter. Several large orders were won in Asia and the Middle East and the good general demand for equipment and aftermarket continued also in other regions.

Sales of portable compressors, primarily serving construction-related customers, had another strong quarter in most markets. Also the portable generator business grew at a healthy pace in the quarter. Most geographical markets had strong growth. The specialty rental business, i.e. rental of portable air and power, developed positively, particularly in Europe, Australia and the Middle East.

New products and solutions were continuously introduced. The product range was, for example, extended with an innovative piping system for compressed air, designed for quick installation and maximum energy efficiency. In the portable compressor range, two new high-pressure, high-volume air compressors were launched.

In July, a contract was signed to acquire the Industrial Division of ABAC Group S.p.A., Italy, a compressor manufacturer, chiefly of piston compressors. The completion date of this acquisition is still awaiting the required approvals from the relevant anti-trust authorities.

Operating profit increased 12% to MSEK 1 350 (1 210). The profit includes a one-time charge of MSEK 83 related to certain pension benefits in Belgium. Adjusted for this, the operating margin was 21.0% (20.9). The margin benefited from the increases in revenue volume and prices, but was negatively affected by changes in exchange rates. The latter had an effect of approximately one percentage point compared to previous year.

Return on capital employed (last 12 months) was 70% (70).

Construction and Mining Technique

The Construction and Mining Technique business area consists of seven divisions in the following product areas: drilling rigs, rock drilling tools, exploration equipment, construction tools, and loading equipment.

MSEK	October – December		Change %	January – December		Change %
	2006	2005		2006	2005	
Orders received	5 509	4 686	+18	20 563	16 581	+24
Revenues	5 060	4 354	+16	18 914	15 154	+25
Operating profit	838	682	+23	3 010	2 073	+45
– as a percentage of revenues	16.6	15.7		15.9	13.7	
Return on capital employed, %	35	28				

- Continued strong demand, primarily in mining applications.
- Organic order growth 26%. Strong growth for both equipment and aftermarket.
- All-time high operating profit and margin.

Sales bridge

MSEK	October – December	
	Orders Received	Revenues
2005	4 686	4 354

%, last 12 months	December	December
	2006	2005
North America	26	27
South America	10	9
Europe	31	31
Africa/Middle East	14	13
Asia/Australia	19	20
	100	100

The demand from the mining industry continued to be strong. Underground mines continued to invest in new equipment and order volumes for underground drilling and loading equipment increased significantly. Also open pit mines continued to invest and order intake of large rotary drilling equipment increased. Sales growth for exploration equipment was also very strong, reflecting a high activity level among customers and high prices of minerals. Production levels continued to be high in most mines around the world and, consequently, sales of aftermarket products and service increased substantially. All geographic regions recorded growth for equipment and aftermarket to mining

applications, with a particularly strong development in South America and Australia.

The overall demand from the construction industry continued to be favorable. Significant sales growth was achieved for light construction equipment, primarily breakers and drills. Sales of rigs for surface applications, such as quarries and road construction, and of underground drilling rigs for infrastructure projects, e.g. tunneling and hydropower, remained on a good level.

Geographically, most regions, including Europe, recorded high sales growth. The demand from some segments in North America, however, was weaker in comparison to the most recent quarters.

As a consequence of the very strong customer demand, several projects and investments to increase capacity and enhance productivity are being carried out in the business area.

Product development activities for new products and design improvements continued to be high. In the quarter, a new range of small hydraulic breakers was launched alongside heavy breakers and other heavy hydraulic demolition equipment. Two large drill rigs for open pit mining were introduced as well as new underground production drilling rigs.

Operating profit increased to MSEK 838 (682), corresponding to an operating margin of 16.6% (15.7). The operating profit benefited from increased revenue volume and price increases. Changes in exchange rates affected the profit margin negatively with about two percentage points compared with previous year.

Return on capital employed (last 12 months) was 35% (28).

Industrial Technique

The Industrial Technique business area consists of five divisions in the following product areas: industrial power tools and assembly systems.

MSEK	October – December		Change %	January – December		Change %
	2006	2005		2006	2005	
Orders received	1 597	1 622	-2	6 533	6 086	+7
Revenues	1 642	1 716	-4	6 440	6 064	+6
Operating profit	348	347	0	1 346	1 200	+12
<i>– as a percentage of revenues</i>	21.2	20.2		20.9	19.8	
Return on capital employed, %	63	66				

- Strong growth within general industry; weaker demand from the motor vehicle industry.
- Record operating margin, thanks to favorable sales mix and efficiency improvements.
- Strategic acquisition in the vehicle service business.

Sales bridge

	100	100

Sales of industrial tools to the general manufacturing industries, e.g. electrical appliances, aerospace, and ship yards, continued to have a very favorable development. Order intake increased significantly and growth was recorded in all regions. Increased marketing and sales activities, combined with a strong product offering, continued to generate a high and steady sales growth.

The demand for, and investments in, advanced industrial tools and assembly systems by the motor vehicle industry decreased compared with previous year. This development was noted in most major markets, except in

North America, where sales stabilized after a period of negative development.

The aftermarket business recorded strong growth in all regions. The service operations, which are designed to improve the customers' processes, increased significantly in Europe.

The vehicle service business, providing large fleet operators and specialized repair shops with tools, recorded healthy growth in all major markets.

The acquisition of Technisches Büro Böhm GmbH (TBB), Germany, was completed in October. TBB specializes in services and consulting for tightening technologies and had an annual turnover of approximately MSEK 54 in 2005 and 30 employees.

In January 2007, an agreement was signed to acquire Rodcraft Beteiligungsgesellschaft mbH & Co. KG, Germany, and all its subsidiaries. The acquired business supplies pneumatic tools and workshop equipment for vehicle service and has annual revenues of approximately MSEK 208 (MEUR 23) and 78 employees. The acquisition is expected to close at the end of the first quarter of 2007.

Operating profit was MSEK 348 (347), corresponding to a record margin of 21.2% (20.2). The operating margin benefited from a favorable sales mix, price increases and improved cost efficiency, but was negatively affected by currency and the lower sales volume.

Return on capital employed (last 12 months) was 63% (66).

Previous near-term demand outlook

(Published October 24, 2006)

The demand for Atlas Copco's products and services, from most customer segments such as mining, construction, and the manufacturing and process industries, is expected to remain at the current high level.

Accounting principles

The consolidated accounts of the Atlas Copco Group are prepared in accordance with IFRS as disclosed in the Annual Report 2005. In accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations, the equipment rental business was classified as held

for sale at the end of March 2006. As from April 1, 2006, no depreciation has been recorded on assets classified as held for sale. The net results of the divested business are recorded as profit from discontinued operations, net of tax.

The interim report is prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Financial Accounting Standards Council's recommendation RR 31 Consolidated Interim Reporting.

The new or amended IFRS standards or IFRIC interpretations, effective since January 1, 2006, have had no material effect on the consolidated income statements or balance sheets.

* Annual revenues and number of employees at time of acquisition/divestment. Due to the relatively small size of the acquisitions, full disclosure as per IFRS 3 is not given in this interim report. The annual report for 2006 will, however, include all stipulated disclosures for acquisitions made during 2006. See the annual report for 2005 for disclosure of acquisitions made in 2005.

Financial targets

The overall objective for the Atlas Copco Group is to grow and to achieve a return on capital employed that will always exceed the Group's average total cost of capital.

The financial targets are:

- to have an annual revenue growth of 8%;
- to reach an operating margin of 15%; and
- to challenge and continuously improve the efficiency of operating capital in terms of fixed assets, stocks, receivables, and rental fleet utilization.

This will have the result that shareholder value is created and continuously increased.

Forward-looking statements

Some statements in this report are forward-looking, and the actual outcomes could be materially different. In addition to the factors explicitly discussed, other factors could have a material effect on the actual outcomes. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.

Atlas Copco AB

Atlas Copco AB and its subsidiaries are sometimes referred to as the Atlas Copco Group, the Group or Atlas Copco. Atlas Copco AB is also sometimes referred to as Atlas Copco. Any mentioning of the Board of Directors or the Directors refers to the Board of Directors of Atlas Copco AB.
