

Industrial Technique

Henrik Elmin, Business Area President
Capital Markets Day 2022

Agenda

The background of the slide is a futuristic, blue-toned image of a car assembly line. A white car is positioned on a conveyor belt, surrounded by several robotic arms and mechanical components. The scene is illuminated with bright blue light, creating a high-tech, industrial atmosphere. The overall aesthetic is clean and modern, emphasizing automation and advanced manufacturing.

- 1 Facts in brief
- 2 Market trends and business fundamentals
- 3 Strategy for growth
- 4 An enabler of the transition to a low carbon society
- 5 Summary

Facts in brief

The market we operate in

ORDERS RECEIVED

January – September 2022

AUTOMOTIVE

Automated and manual assembly solutions

Vision systems for robot guidance, quality control and metrology

GENERAL MANUFACTURING

Automated and manual assembly solutions

Vision systems for robot guidance, quality control and metrology

Material removal tools

ELECTRONICS

Automated and manual assembly solutions

PROCESS INDUSTRIES

Vision systems for quality control

AEROSPACE

Automated and manual assembly solutions

Industrial Technique

ROCE
18%

DEMAND DRIVERS

- Industrial production
- Investments in transformation to a low-carbon society
- Automotive capex
- Changes in manufacturing methods and higher requirements, e.g. quality assurance and flexibility
- Deglobalization

Orders received July – September 2022 vs 2021

* Growth in local currency.

The market and business fundamentals

Smart manufacturing solutions

General industries Automotive

Tightening

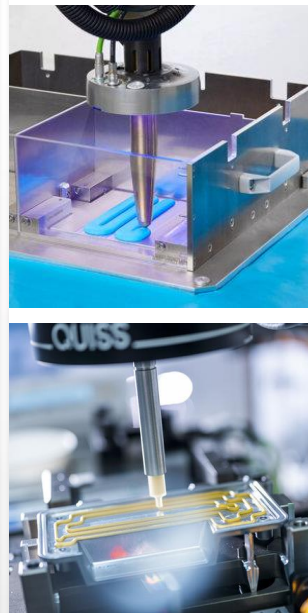

Material removal

Drilling

Dispensing

Self-pierce riveting

Flow drill fastening

Machine vision

Customer industries

Well aligned with technology trends

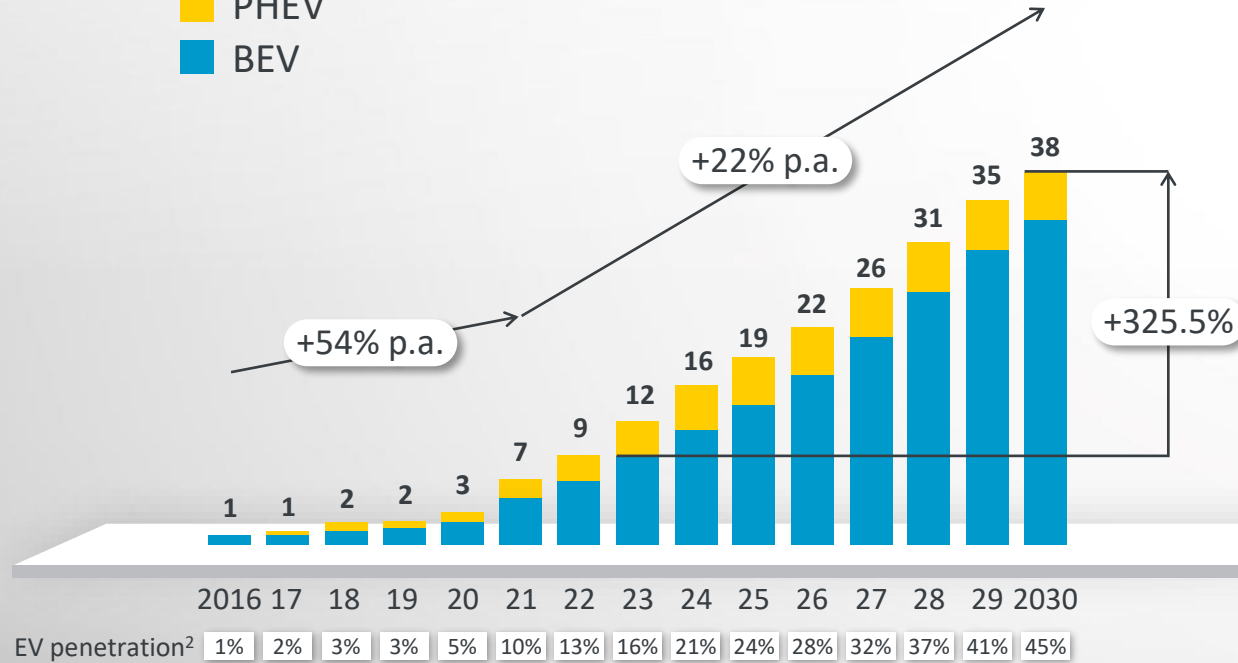

Battery electric vehicles

Electric Vehicle share expected to grow to 45% in 2030

GLOBAL ELECTRIC¹ PASSENGER CAR SALES, mn units

■ PHEV
■ BEV

GLOBAL PASSENGER CAR SALES, mn units

1. BEV and PHEV.

2. Share of BEV and PHEV in percentage of total passenger car sales.

Source: EV-volumes, HIS Markit (Light Vehicle Sales Forecast Jan 2022), McKinsey.

Challenges for Battery Electric Vehicles manufacturers

Time to Market

Capacity & performance

Defects & Recalls

Sustainability
incl. weight

0 | Cell component inspection

1 | Cell inspection

2 | Cell stack assembly

3 | Module assembly

4 | Battery tray assembly

5 | Thermal management

Data-driven process optimization

6 | Assembly of modules

7 | Assembly of electrical components

8 | Fire protection

9 | Cover sealing

10 | Cover-to-tray assembly

11 | Corrosion protection

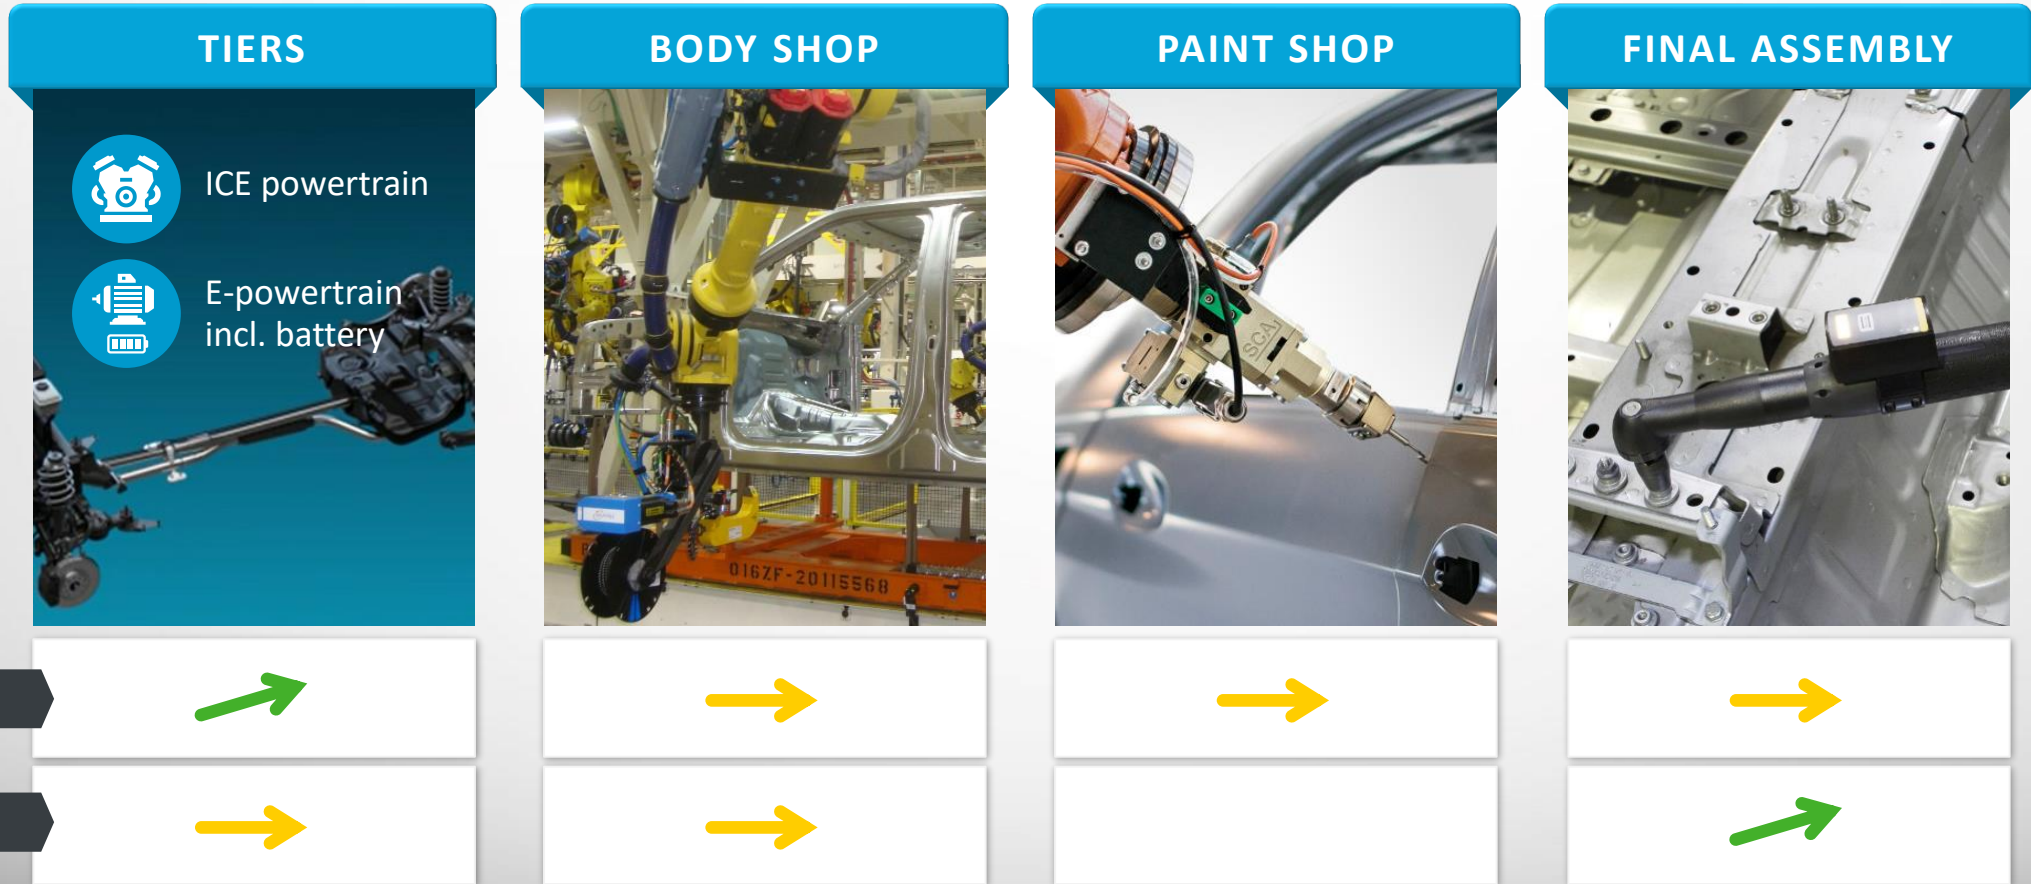

Our Innovation Center

The place where we connect experts to drive innovations and improve our customer's production processes

How does the EV development impact Industrial Technique?

Leading EV model in 2022 vs typical ICE model in 2018

Machine Vision

Drivers for machine vision

In line quality and process control

Assembly technologies + Integrated vision

Go to market strategy – Application specific products

END CUSTOMERS & SYSTEM INTEGRATORS

INTEGRATED VISION SOLUTIONS

Industrial
Assembly Solutions

General Industry Tools
and Assembly Systems

Motor Vehicle Industry Tools
and Assembly Systems

Chicago Pneumatic
Tools

SMART FACTORY AUTOMATION

SURFACE VISION

Machine Vision Solutions

Machine vision focus areas

- Application specific products
 - Surface vision
 - Smart factory automation
- Integrated vision solutions, combined with assembly technologies
- Increase presence in Americas and Asia
- Operational excellence
- Pro-active service business
- Mergers & acquisitions

General Industry growth

General industry – Segment approach

Adapted market offer for key segments based on standard technology

Transformation potential

Service

Industrial Technique – Service and consumables

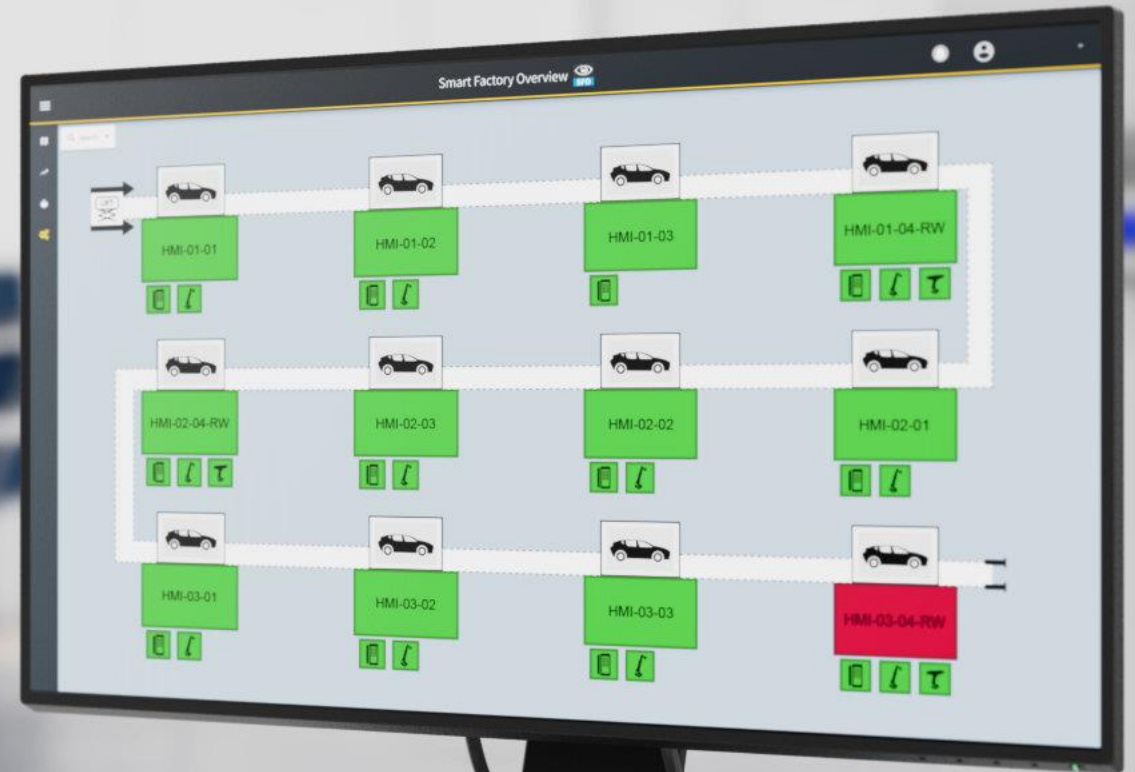

Data driven service

Data driven service

Approx. 270 Tool Management Centers globally

Data driven service

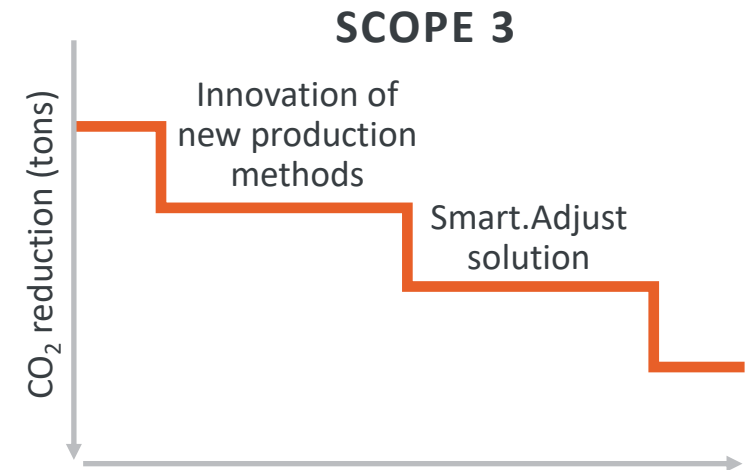

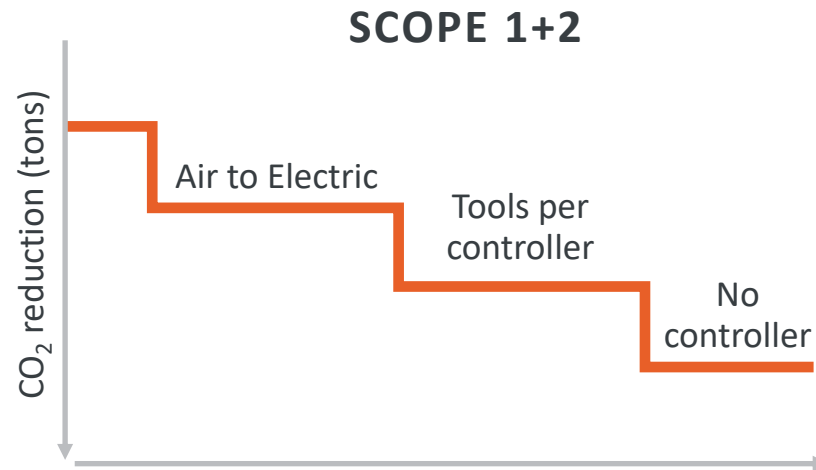

Approx. 270 Tool Management Centers globally

An enabler of the transition to a low carbon society

Four steps to reduce CO₂ in manufacturing

Industrial Technique People Strategy

- Leadership which enables our people and teams to have a sense of purpose, feel appreciated and empowered to reach full potential
- Example: Customer Center of the Future

- A culture of accelerated and self-driven learning to ensure the right competence and mindset to drive transformation and perform at full potential
- Example: Agile teams

- An attractive and inclusive environment, in which our people and future talent are confident in bringing their best selves and achieve their full potential
- Example: Global Industrial Internship Program

Summary – Industrial Technique

- Well positioned in global trends
 - Battery electric trends
 - Industry 4.0 including Automation
 - Deglobalization
- Machine vision focus on
 - Application specific products
 - Integrated vision
- Sustainability key driver of business and investments

Forward-looking statements

“Some statements herein are forward-looking, and the actual outcome could be materially different. In addition to the factors explicitly commented upon other factors could have a material effect on the actual outcome. Such factors include, but are not limited to, general business conditions, fluctuations in exchange rates and interest rates, political developments, the impact of competing products and their pricing, product development, commercialization and technological difficulties, interruptions in supply, and major customer credit losses.”
