

Atlas Copco's Coronavirus (COVID-19) Action Plan

Atlas Copco Crisis Committees are continually monitoring the threat, and have activated business continuity plans to protect the health and safety of our employees, customers, and other stakeholders.

The main actions undertaken by Atlas Copco include:

Securing the supply chain from our decentralized factories and distribution centres

Restricting domestic travel to business critical instances

Implementing risk assessments for customer site visits

Business continuity plan pressure testing with live simulations

Implementing health declaration processes

Many employees working from home where possible

A focus on personal hygiene, and more stringent company facility cleaning processes
