Hydrogen Compression Systems

End-to-end compression, storage, and dispensing systems for hydrogen fueling

- High-pressure – up to 10,150 PSI for vehicle fueling
- High flow rate capability for direct fill
- Hydraulic or piston, oil-free boosters
- Modular concept to ensure uptime and easy maintenance
- Packaged unit options include a closed loop cooling system and controller
- Weatherproof container packages

Atlas Copco

Innovation for a decarbonised future

“Hydrogen is a key driver of decarbonization and the energy transition. Across the United States, Atlas Copco’s mission is to save over \$1 billion in annual electricity costs, while reducing CO2 emissions by 9 million metric tons.”
