

Our promise to you and our customers is that we do more. What does that mean?

Simply, we go further, bringing innovation to every aspect of our offering to you – and that extends way beyond products. Every compressor, dryer, vacuum pump, blower, and gas generation system that's sold with our name on it comes with this promise. We innovate in focused areas where we are

confident we can provide a complete solution that has the lowest cost of ownership, maximizing efficiency and, most importantly, offer a complete, customized service package that is second to none – including remote monitoring and auditing services.

Meet Jeff, an Atlas Copco Service Technician

Name: Jeff McCrary

Length of service: 9 years

Q: What's so great about being a service technician?

A: No two days are ever the same. I love the diversity of the job and meeting people. My fully loaded truck is truly my office and I enjoy spending time on the road. Our equipment range is also very diverse, and I enjoy keeping up with the latest technology, learning how to keep it running in perfect order.

Q: You must see some cool stuff?

A: The applications for compressed air equipment are just about endless. From theme parks to widget making, and everything in-between. I love getting a chance to see how things are made while I am checking on our equipment. You get to see how a lot of stuff is made or built – that's a pretty cool thing!

Q: How has the job changed in the last decade?

A: Like most mechanical applications, they have become less about wrenches and more about digital connectivity. That being said, there are still plenty of opportunities to get my hands dirty! The digital aspect also really helps to keep paperwork down – something I love.

Q: What advice would you give to somebody thinking about joining Atlas Copco?

A: It's a choice you won't regret, with endless possibilities. From the opportunity to work on different products, to opportunities all across the United States and overseas.

We're looking for people like you!

Enjoy a working environment where no two days are ever the same. Plus, paperwork not your thing? Don't worry, we boast one of the most digitally connected workforces on the road today. We're looking for service technicians of all experience levels.
