

Time to Look at Your Air System?

We Provide **Three Ways** to Buy:

Purchase Equipment

You purchase the equipment, either outright or through our zero-down finance programs.

Lease Equipment

You lease the equipment for a defined period and have options to buy at the end of the lease.

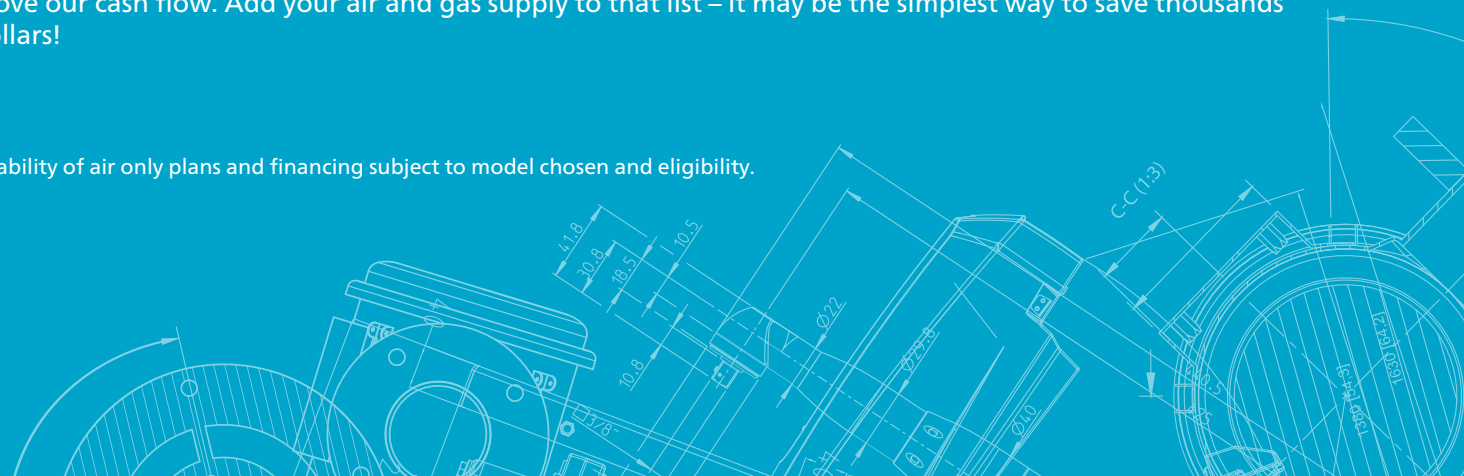

Buy Air Only

Purchase air like a utility. Depending on the program, full system design services and all maintenance is included.

Which one is right for my business?

That's a great question! At this stage, the honest answer is that we probably don't know, but the good news is that we have all the tools and calculators (even without having to visit you) required to find the answer to this important question. There has probably never been a better time to find out, due to great finance rates and purchasing options available. We are all exploring whether new deals make sense, to reduce our expenses and improve our cash flow. Add your air and gas supply to that list – it may be the simplest way to save thousands of dollars!

*Availability of air only plans and financing subject to model chosen and eligibility.
