

PUMPS

PAC H108

FRACKING

Williston, ND

APPLICATION: Fracking

PROBLEM: Recirculation of blend line

CUSTOMER: Interstate Power Systems

PRODUCT: PAC H108

With Atlas Copco Dealer, Interstate Power Systems, the PAC H108 JD 325HP FT4 pump was used to aid in the process of fracking a well in Williston, North Dakota. It was mainly to help recirculating a line to blend frac going downhole. Fracking is a technique involving the fracturing of bedrock formations by pressurized liquid which gives the ability to reach natural gas, petroleum, and brine.
