ORIGINAL PART

# ELEMENT OVERHAUL

## IT'S TIME

- The element is the heart of your compressor.
- After a long period of operation, it is subject to wear.
- When you start paying attention, it may already be too late.
- Compressor performance and efficiency may decrease.
- Even worse, a breakdown could occur, causing production and revenue loss.

## FIGURE IT OUT

## TO ACT

- Pay attention to running hours and operating conditions of the compressor.
- Order a timely element overhaul from your trusted equipment supplier.
- Certified technicians perform the overhaul according to machine specifications, using qualified tools and Original Parts only.
- This is your guarantee for minimal downtime, restored efficiency and long-term reliability.
- That's why cheap alternatives turn out to be much more expensive.

## 12 MONTHS

Warranty of overhaul service.

## UP TO 60%

Saving compared to an investment in a new element.
