

Transform Your Business With the Power of Financing

Think financing is just another way to pay for your Chicago Pneumatic solution? Join businesses across the country and tap into the real power of financing with CP Finance.

CP Finance is the easy, affordable way to get the compressors and air treatment equipment your business needs to stay agile, competitive and profitable.

Why CP Finance Is the Best Way to Equip Your Business

100% Financing

CP Finance enables you to finance 100% of the equipment cost. You can also include other costs such as taxes, delivery and installation charges.

No Drain on Cash

Financing equipment frees up working capital for other critical needs so you won't need to tie up precious cash.

Upgrade Equipment

Financing allows you to upgrade your equipment and software when new technology becomes available, not when it becomes obsolete.

Preserve Credit Lines

Our financing has no effect on existing credit lines, so they remain ready whenever you need them.

Exceptional Payment Flexibility

Financing can be tailored to the specific financial needs of your business. Payments can be structured to meet cash flow fluctuations and there are many end-of-term options to choose from. Other forms of financing are much more rigid.

Eliminate Equipment Disposal Challenges

We will manage the disposition of your equipment at the end of the term.

Transform your business with CP Finance's easy, affordable financing. Visit <https://www.cp.com/en-us/compressors/finance> or contact:

LEAF Commercial Capital, Inc. is a subsidiary of People's United Bank, N.A.

Terms and Conditions: All applications are subject to credit approval. LEAF finances equipment only for business purposes and not for personal, family or household use.
